

The VectorGel™ Bird Free Gel is a new highly efficient long lasting bird repellent gel. Proven to deter many birds, including Pigeons and Sea Gulls, this product can be used in a variety of locations without harming them. Locations include the home, government buildings, historical monuments, shops, train station roofs etc.

This completely natural, non-toxic 4in1 gel, has been specially formulated with food-grade material to work on four of the animal senses: Sight, Smell, Taste and Touch.

Sight: This new high-tech gel emits strong Ultra Violet Rays which startles the birds when they try to approach it. A feeling of warning and danger keeps them away .

Taste: Made with a special blend of oils this gel has a disgusting taste to birds. Once eaten, it causes the birds to leave immediately and learn over time not to return to the same spot.

Smell: Made with natural herbal extracts. VectorGel™ Bird Free Gel, has a specially formulated smell which creates an unfamiliar and distressing environment for the birds to perch on. With olfactory enhancers, this smell repellent makes it one of the most efficient in the market.

Touch: Thanks to its sticky consistency, this gel prevents birds landing on it again because of their “tacky” feel. They learn over time not to return to the same spot.

The VectorGel™ Bird Free Gel comes available in a 250gr Tube for use with a Caulking gun. A 200gr squeeze tube for DIY applications. And ready-to-go 15gr pre-dosed magnetized dishes.
